

A keen individual with two years of experience in Market & Advertising field. I am currently pursuing Advertising Account Management from Sheridan college.

I am very passionate about creating creative content and tend to always add some fun into the daily mundane life.

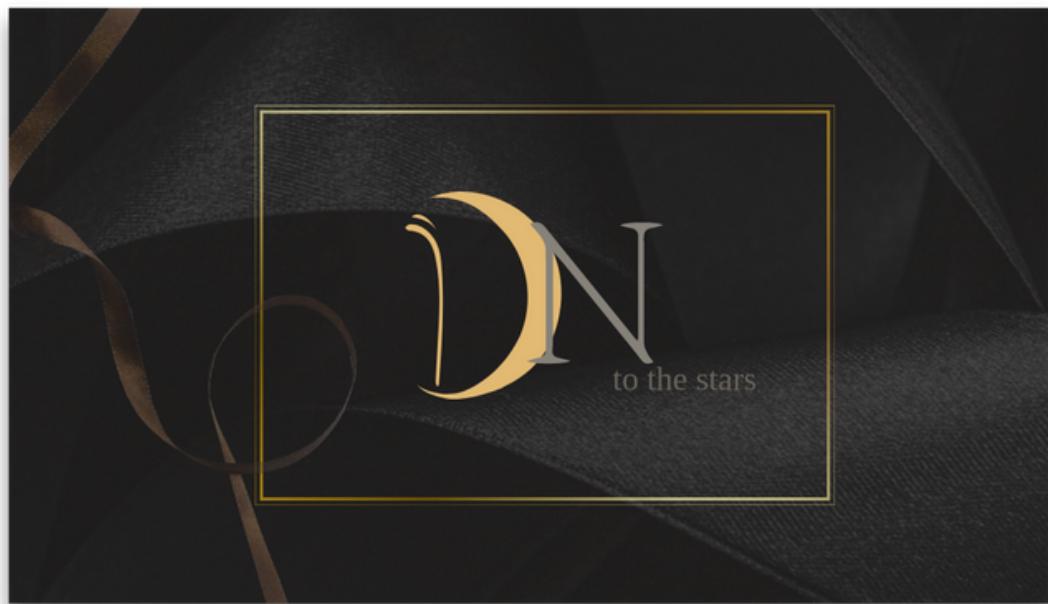

What is life without some creativity ?

I believe my knowledge in this field will help me to attain a Digital Advertising position in a reputed Ad agency.

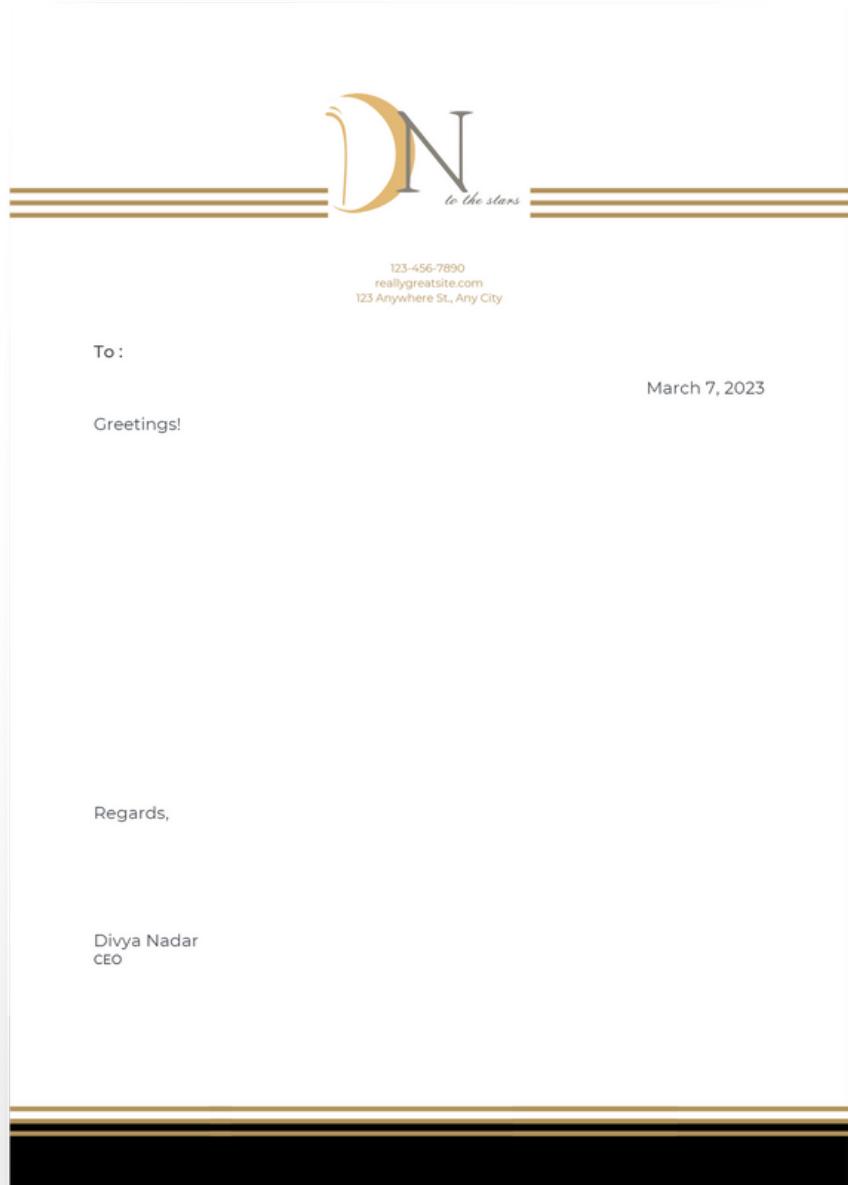

- Play on the Initials of my name - Divya Nadar
- Created for my Instagram page which focuses on photography of nature
- Used moon because firstly I am a moon-child, secondly it depicts nature and everyday phenomena
- The page name is to the stars, so the moon is made to look like the initial D
- Showcased in both the background, as stars and moon usually shine the brightest at night
